Introduction
The Tech-Cam is a precision tool designed to allow a technician to view into inaccessible locations. It has a detachable wireless monitor that enables the image to be viewed while the camera is in a confined area. It also has a wireless dongle that will allow remote viewing over the internet. The images and video can be saved onto the monitors memory and transferred to a PC. These files and images can then be distributed for inspection.

Features
- Allows for easy surveying of small, hard-to-reach places.
- Mini 9mm waterproof LED lens, 1.0 meter flexible tube.
- Manufactured and tested to IP67 waterproof standard.
- 3.5”TFT-LCD detachable/mountable monitor, built-in rechargeable Li-battery.
- Video recording capability, supports up to 32GB micro SD card.
- Adjustable brightness on lens-mounted LED light.
- 3 useful accessories included: Hook, mirror and magnet.
- Lightweight, handheld design, flexible and convenient to use.
- Multi-language support.
- Wireless real-time viewing on a PC with the wireless dongle.
- Can be used retrieve and manipulate small difficult to reach objects.

Components
Initial Set-up

To Install Batteries in the camera handle

1. Using a Philips head screwdriver, remove screw and cover as illustrated below:

2. Remove battery compartment and insert four (4) AA batteries into their appropriate slots, with proper orientation, as indicated on the battery compartment.

3. Reinstall battery compartment and replace battery cover and screw.

Battery Charger

The AA NiMH batteries can be charged with the supplied battery charger. Detailed instructions can be found in the original packaging.

To charge the monitor connect the monitor to an appropriate (100-240V ~ 50/60Hz) power source with the provided adapter. The power indicator LED will illuminate red and the battery capacity icon on the LCD will flicker, indicating that the battery is charging. When the red indicator light disappears, the battery has been fully charged.

Software Installation

1. Insert the CD.

2. If the CD does not auto run open My Computer and double click on the CD drive.

3. Install the Tech-Link software with the following instructions. This will allow you to view the camera in realtime on the PC.

4. Install the Xvid Codec with the following instructions. This will allow you to view recorded videos on a PC.

</table>
**Tech-Link Software Installation**

1. Run the file named TechLinkSetup.msi
2. At the welcome screen click Next.
3. Choose an installation directory. Program Files is default. Click Next.
4. Click Install.
5. Make sure “Launch TechLink” is checked and click Finish.
6. The Wireless USB Dongle software wizard will now launch. When prompted to insert the camera, plug the TechLink into a USB port and click Yes.
7. If prompted to install an unsigned driver click Continue Anyway.
8. Click Finish when prompted.

**Attaching Camera**

To connect the flexible tube camera with control handle, first make sure that the keyed end of the tube is aligned with the slot in the handle, then use slight force to push them together. Once properly aligned, twist the threaded knob clockwise until the connection is securely in place.

**Xvid Codec Installation**

1. Click Next at the welcome screen.
2. Accept the license agreement and click Next.
3. Choose the installation folder and click Next.
4. Click Yes to automatically check for updates.

**Attaching Monitor**

To attach the monitor, place the slot on the back of the monitor over the tab on the camera handle. Push down on the monitor until it clicks into place.
**Attaching Camera Accessories**

Insert the end of either the mirror, hook, or magnet into the small hole in the end of the camera tube. Now slide the rubber ring over the accessory and the camera to secure it.

**Monitor Mounting Bracket**

To install the magnetic monitor mounting bracket, slide the monitor on using the same method as attaching it to the camera handle. The mounting surface should be clean before attaching.

**SD Memory Card**

After SD card is inserted into SD card slot successfully, an SD card icon will appear on the monitor screen; otherwise, the ‘no SD card’ icon will show.

**Basic Operation**

1. As you roll the power switch to turn on the camera, the power indicator on the camera handle will light. The rolling switch then acts as a dimmer for the twin LEDs that surround the camera on the end of the flexible tube.

2. Press and hold the power switch for 2 seconds on the monitor until the power indicator illuminates green. Then press the “down” button to select CH4 (channel 4), or until the picture from the lens is displayed on the monitor. To toggle between video recording and picture taking functions, press the “up” button on the side of the monitor.
Recording Video

1. In real-time monitoring mode, press the button to toggle to video recording mode.
2. Press the ‘OK’ button to begin recording:
3. Press again to stop recording.

- The video will be automatically saved as an individual file every 30 minutes.
- The icon indicates that the SD card memory is full.

Taking a Picture

1. In real-time monitoring mode, press the button to toggle to picture mode.
2. Press the ‘OK’ button to take a picture.

Playback Video or Picture

1. In real-time monitoring mode, press the button to toggle to the video/picture folder.
2. Press the and buttons to select your desired folder, then the press ‘OK’ to toggle to the following interface:

   ![Playback Interface]

   **Note:** A quotation mark (”) next to a file name indicates that the file is a video. No double quotation mark next to a file indicates that the file is a picture.

   **For playback video:** Press the or button to select your desired video, and then press ‘OK’ to playback.

   **Pause:** press the ‘OK’ button once to pause, press again to resume play.

   **Fast Forward:** press the button.

   **Rewind:** press the button.

   **Stop/Exit:** press the button.

   **To view pictures:** Press the or button to select your desired video, press ‘OK’ button to view and press again to exit.
Deleting Video/Picture

1. In real-time monitoring mode, press the button to toggle to the video/picture folder.
2. Press the or button to select your desired folder, and then press ‘OK’ button.
3. Press the or button to select your desired file, and then press and hold the button for 2 seconds, or until the following interface appears:

   ![DELETE CURRENT FILE?]

4. Press the or button to toggle between YES and NO, that is, to delete or cancel. Once you have highlighted your desired selection, press the ‘OK’ button.

How to Enter the Setting Mode

In real-time monitoring mode, press and hold the button for 1-2 seconds, or until the following interface appears:

![SYSTEM SETTING]

Language Setting

1. In the setting mode, press the or button to select ‘SYSTEM SETTING’, and then press ‘OK’ button.
2. Press the or button to select ‘Language’, then press ‘OK’ button, the following interface will appear:

   ![Language]

3. Press the or button to select a desired language.
4. Press ‘OK’ button to confirm and exit.

Video System Setting

1. In the setting mode, press the or button to select ‘SYSTEM SETTING’, then press ‘OK’ button.
2. Press the or button to select ‘Video System’ and then press ‘OK’ button.
3. Press the or button to toggle between NTSC and PAL. Once your desired system is selected, press ‘OK’ button to confirm and exit.

Formatting

1. In the setting mode, press the or button to select ‘SYSTEM SETTING’, and then press ‘OK’ button.
2. Press the or button to select ‘Format’, and then press ‘OK’ button.
3. Press the or button to toggle between YES and NO, that is, to format or cancel. Once you have highlighted your desired selection, press the ‘OK’ button.
Default Setup

1. In the setting mode, press the \( \text{③} \) or \( \text{④} \) button to select ‘SYSTEM SETTING’, then press ‘OK’ button.
2. Press the \( \text{③} \) or \( \text{④} \) button to select ‘Default Setup’ and then press ‘OK’ button.
3. Press the \( \text{③} \) or \( \text{④} \) button to toggle between YES and NO, that is to restore.

View Version Information

1. In the setting mode, press the \( \text{③} \) or \( \text{④} \) button to select ‘SYSTEM SETTING’, and then press ‘OK’ button.
2. Press the \( \text{③} \) or \( \text{④} \) button to select ‘Version’ and then press ‘OK’ button. You will now be able to view the version details of your product.

Frame Rate Setting

1. In the setting mode, press the \( \text{③} \) or \( \text{④} \) button to select ‘RECORDE R SETTING’, and then press ‘OK’ button.
2. Press the \( \text{③} \) or \( \text{④} \) button to select ‘Frame Rate’ and then press ‘OK’ button.
3. Press the \( \text{③} \) or \( \text{④} \) button to toggle between different frame rates. Once your desired rate is selected, press ‘OK’ button to confirm and exit.

Time Stamp Setting

1. In the setting mode, press the \( \text{③} \) or \( \text{④} \) button to select ‘RECORDE R SETTING’, and then press ‘OK’ button.
2. Press the \( \text{③} \) or \( \text{④} \) button to select ‘Time Stamp’ and then press ‘OK’ button.
3. Press the \( \text{③} \) and \( \text{④} \) buttons to toggle between on and off. Once your desired selection is made, press ‘OK’ button to confirm and exit.

Recording Type

1. In the setting mode, press the \( \text{③} \) or \( \text{④} \) button to select ‘RECORDE R SETTING’, and then press ‘OK’ button.
2. Press the \( \text{③} \) or \( \text{④} \) button to select ‘Recording Type’ and then press ‘OK’ button.
3. Press the \( \text{③} \) or \( \text{④} \) button to toggle between ‘still’ and ‘video’. Once your desired selection is made, press ‘OK’ button to confirm and exit.

Date/Time Setting

1. In the setting mode, press the \( \text{③} \) or \( \text{④} \) button to select ‘Date/Time’ and then press ‘OK’, The following interface will appear:

   ![Date/Time Interface](image)

2. Press ‘OK’ button to select Date or Time; Press the \( \text{③} \) or \( \text{④} \) button to adjust selection; Press the button to confirm and exit.

Event Playback

1. In the setting mode, press the \( \text{③} \) or \( \text{④} \) button to select ‘EVENT PLAYBACK’, and then press ‘OK’ button.
2. Refer to user manual instructions on Playback of Video/Picture, Deleting Video/Picture, and Deleting Folder for guidance.
PC Software Use

To download recorded files to PC:

1. Connect the USB cable from the monitor to the laptop and power on the monitor.
2. The dialogue box should start automatically. Select “copy pictures to a folder”.
3. The wizard will then guide you through the download process.

*Note:* You can also browse the files manually by clicking “My Computer”

Viewing a Live Stream

1. Connect the dongle to the USB extension.
2. Power on just the camera handle (the monitor may need to be undocked).
3. Click the “View wireless USB Dongle” icon.
4. This will then launch the live view.

## FCC Information

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference;
2. This device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.
## Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible causes</th>
<th>Possible Solutions</th>
</tr>
</thead>
</table>
| Tech•Cam will not start or Power On | • LCD Monitor Not charged  
• LCD Monitor needs to be re-set  
• AA batteries in Camera Handle Assembly need charging or replacement | • Use power adapter to charge LCD monitor  
• Charge AA batteries in the Camera Handle Assembly  
• Perform LCD monitor re-set procedure by inserting a pin into the back of the monitor. The hole is labeled “reset” |
| LCD monitor will not charge | • Power adapter cable not attached properly to LCD Monitor  
• Power adapter cable not connected to power | • Make sure power adapter cable is connected correctly at the LCD monitor connection point  
• Make sure that the power adapter cable is securely plugged into the 110 VAC wall socket |
| Image on the LCD display is too dark or too light | • LEDs near camera need adjustment  
• LCD Monitor needs adjustment | • Use dial on camera handle assembly to adjust brightness of LEDs  
• Use contrast and brightness buttons on LCD monitor to adjust the image |
| When using the Tech•Link Wireless Video Receiver, the two images appear on the PC display | • Software drivers for Tech•Link are not properly installed  
• Dongle needs to be restarted | • Uninstall drivers from add/remove programs. Reinstall  
• Unplug dongle from USB and wait 10 seconds. Reconnect dongle |
| When using the Tech•Link Wireless Video Receiver, there seems to be interference with the PC display image | • Wireless radio from the C-III could be causing the interference  
• Other external wireless devices could be causing the interference | • Make sure the Tech•Link wireless video receiver is connected to the C-III with the USB extension cable  
• Turn Off the wireless radio on the C-III or on the laptop or PC that you are using  
• Try to keep the Tech•Cam unit as close to the Tech•Link wireless video receiver as possible  
**Note:** Some interference may not be able to be prevented due to the nature of this product |
| The camera flexible tube lens appears to be scratched. There is a line on the monitor | • End user may have bumped the camera into a solid surface which created the scratch  
• Pixels may be out on monitor | • Use mild detergent to clean the lens  
• Swap camera assemblies |
| LED lights don’t turn on or adjust | • Switch may not be properly rotated  
• Camera may be bad  
• Switch may be bad | • Ensure switch is rotated into the on position  
• Swap cameras to see if LEDs are bad on camera |
## Warranty

**THIS WARRANTY IS EXPRESSLY LIMITED TO ORIGINAL RETAIL BUYERS OF BOSCH ELECTRONIC DIAGNOSTIC TOOLS (“UNITS”).**

Bosch Units are warranted against defects in materials and workmanship for two years (24 months from date of delivery. This warranty does not cover any Unit that has been abused, altered, used for a purpose other than that for which it was intended, or used in a manner inconsistent with instructions regarding use. The sole and exclusive remedy for any Unit found to be defective is repair or replacement, at the option of Bosch. In no event shall Bosch be liable for any direct, indirect, special, incidental or consequential damages (including lost profit) whether based on warranty, contract, tort or any other legal theory. The existence of a defect shall be determined by Bosch in accordance with procedures established by Bosch. No one is authorized to make any statement or representation altering the terms of this warranty.

**THE ABOVE WARRANTY IS IN LIEU OF ANY OTHER WARRANTY, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.**

Unit software is proprietary, confidential information protected under copyright law. Users have no right in or title to Unit software other than a limited right of use revocable by Bosch. Unit software may not be transferred or disclosed without the written consent of Bosch. Unit software may not be copied except in ordinary backup procedures.
